|-----------------------------------------------------------------------------------------------------------------|-----|
| Preface | 7 |
| 1. A short introduction | 9 |
| 1.1. The work | 9 |
| 1.2. The fun | 17 |
| 2. On the threefold import of constitutive rules | 27 |
| 2.1. A quick and dirty introduction | 27 |
| 2.2. What are CRs, really? | 29 |
| 2.3. So, what use are CRs? | 30 |
| 3. A long introduction | 35 |
| 3.1. A simple example: children's game, raising a flag as a greeting | 37 |
| 3.2. Some general properties of CRs | 39 |
| 3.3. Classifications of CRs | 50 |
| 3.4. The importance of CRs | 57 |
| 3.5. Finally: but are there any CRs at all? | 59 |
| 4. A classification of CRs | 75 |
| 5. On the very idea of a CR. Sceptical considerations | 95 |
| 5.1. Introduction | 95 |
| 5.2. CRs vs. regulative rules: is this not a spurious opposition? | 97 |
| 5.3. An instructive example: the rules of chess | 99 |
| 5.4. In what sense are rules of chess constitutive and not regulative? | 100 |
| 5.5. Regulative vs. constitutive: a distinction regained | 102 |
| 5.6. Why should there be CRs at all? | 105 |
| 5.7. The relevance of understanding the «count(s) as» pseudo-copula correctly for proper delimitation of CRs | 109 |
| 5.8. A reply to Professor Ottonelli | 113 |
| 6. On the constitutive force of regulative rules | 125 |

| | |
|----------------------------------------------------------------------------------------------------|-----|
| 7. On the ontology and the normative aspect of CRs | 135 |
| 7.1. Introduction | 135 |
| 7.2. Some examples | 141 |
| 7.3. Morals from the examples: delimitation of the constitutive, its relation to the regulative | 145 |
| 8. CRs as variable expressions of human nature | 151 |
| References | 157 |
| Index | 173 |
